Graha Bunga GB 8/5, RT003/RW008, Pondok Kacang Barat, Pondok Aren

Motivated and detail-oriented Front End Developer with hands-on experience gained through internship, technical tests, and personal projects. Proficient in building responsive and user-friendly web interfaces using HTML, CSS, JavaScript, React.js, and Next.js. Demonstrated ability to collaborate with teams, meet deadlines, and deliver clean, functional code. Passionate about UI/UX principles, with experience in designing and developing intuitive user interfaces using Figma and modern front-end frameworks. Eager to contribute and grow in a dynamic tech environment.

WORK EXPERIENCES

PT. Asuransi Sinar Mas - Jakarta, Indonesia   **Sep 2018 - Apr 2019**
Administration Intern

- Assisted in the administrative process of spare parts procurement and vehicle repair services.
- Coordinated directly with partner workshops regarding repair requests, scheduling, and work status.
- Entered and updated partner workshop data and vehicle parts information using Microsoft Excel.
- Supported the entry and verification of insurance claim documents related to vehicle loss or damage.
- Collected and compared quotations from vendors for procurement needs.
- Checked supporting documents such as invoices, delivery notes, and handover reports.
- Prepared weekly and monthly procurement activity reports for internal team use.
- Participated in testing of internal web-based systems developed using the Pega platform, including form flow validation, data input checks, and basic bug reporting to the IT team.

Virtual Internship Experience by Rakamin Academy& Telkom   **Jun 2022 - Jul 2022**
DigitalAmoeba - Jakarta, Indonesia
UX Researcher Intern

- Collaborated daily with the UX team to enhance project outcomes.
- Analyzed performance data for the "Idea Box" application to identify areas for improvement.
- Developed a comprehensive research plan utilizing survey methods and usability testing aimed at increasing conversion rates and the number of users successfully showcasing their ideas on the investor dashboard.
- Designed and administered usability testing tasks and post-test questions to gather actionable insights.
- Created and deployed screening surveys to select participants for usability testing.
- Developed empathy maps to uncover user insights and provide actionable recommendations for design improvements

Berani Digital ID - Jakarta, Indonesia   **Mar 2023 - Aug 2023**
UI/UX Designer Intern

- Developed wireframes for the Attendance Module and E-Commerce Module within the UMKM Super App.
- Collaborated daily with Product Manager and UI/UX Team to ensure alignment with project goals and user needs.
- Designed low-fidelity wireframes for various components of the UMKM Super App to visualize and iterate on user interface concepts.

- Project: Created "All You Can Eat Restaurant" Information System Database.

Binar Academy - Jakarta, Indonesia   **Aug 2022 - Dec 2022**
Certificate in UI / UX Design & Research
- Project: Developed a waste management app prototype.
- Project: Revamped the PeduliLindungi app prototype.
- Project: Created a ticket booking web app prototype.

PROJECT EXPERIENCE

All You Can Eat Restaurant Information System Database   **Aug 2021**
Database Designer

The function of an "All You Can Eat Restaurant" information system database is to store, organize, and manage all data related to the restaurant's operations, ensuring seamless coordination between different departments and enhancing efficiency.
- Created and developed the business process of "All You Can Eat Resturant" within 2 days.
- Created and defined the entities and attributes of "All You Can Eat Restaurant" in 2 days.
- Created a comprehensive Entity Relationship Diagram (ERD) of "All You Can Eat Restaurant" 2 days to visualize data relationships and enhance database implementation.

Revamp PeduliLindungi App Prototype   **Aug 2022**
UI / UX Designer

PeduliLindungi is an application developed to assist government agencies in tracking and curbing the spread of Coronavirus Disease (COVID-19).
- Created and developed a new feature called "Hoax Buster" in PeduliLindungi within 1 month.
- Designed app wireframes using Whimsical in 2 days.
- Designed app user flows using Miro in 2 days.
- Developed two attractive UI pages for the "Hoax Buster" and article sections using Figma within 4 days.
- Conducted usability testing using MAZE in 2 days.

WasteBag - Waste Management App Prototype   **Oct 2022 - Nov 2022**
UX Designer

WasteBag is a mobile application designed to help users manage and minimize household waste, including plastic, cardboard, glass, cooking oil, aluminum, and wood.

- Developed WasteBag, a waste management app that enables users to easily locate the nearest waste drop-off locations and provides rewards in the form of balance credits after selling waste, within 1 month.
- Created the app's information architecture and flowchart using Miro in 2 weeks.
- Designed and developed app wireframes using Figma in 2 weeks.
- Created two attractive UI pages, including the Homepage and Pickup Message page, using Figma in 7 days.
- Conducted usability testing using MAZE in 2 days.
- Collaborated with a team consisting of 1 UI Designer, 1 UX Researcher, and 2 Product Managers.

D'House Of Learning Room Booking App   **Aug 2023 - Sep 2023**
Front End Developer (Mendix)

D'House Of Learning booking app is a web application that allows users to reserve and manage bookings for various types of rooms or spaces. These apps are commonly used in a variety of settings, including meeting room, conference centers, coworking spaces, and classrooms.

- Designed and created UI pages for the Room Booking App using Figma.
- Led the design, development, testing, and deployment of the Room Booking App for both web and mobile platforms.

Smart Banking App   **Aug 2023 - Sep 2023**
Front End Developer (Mendix)

Smart Banking App is a mobile and web application that offers modern and innovative financial services, leveraging technology to provide a more convenient, user-friendly, and efficient banking experience.

- Designed and created UI pages for the product catalog of the Smart Banking App using Figma.
- Developed UI forms within the product catalog page for adding new products using Mendix Studio Pro.

Driver Recruitment System Web App (For Admin & User)   **May 2024 - Jul 2024**
Front End Developer / UI/UX Designer

Driver Recruitment System Web App is a web-based application designed to facilitate the recruitment, management, and onboarding of drivers for companies, typically within industries such as logistics, transportation, and delivery services. This type of system streamlines the entire recruitment process from job posting to hiring, providing a centralized platform for both recruiters and applicants.

- Designed the UI page for the company website homepage.
- Developed the Applicant Form UI page, including functionality for application submission and scheduling theoretical and practical tests.
- Created the Rejected page for the company website and compiled technical report documentation.

Elemes.id Landing Page   **Mar 2025**
Front End Developer (Technical Test)

Elemes.id Landing Page is a front-end web project developed as part of a technical test for the Front-End Developer position at Elemes.id a product and tech agency company. The landing page was built to reflect the company's brand and showcase a modern, clean, and responsive UI design with strong calls-to-action for ordering and learning more about the service.

- Designed and built a responsive landing page including hero section, navigation, and CTA buttons.
- Implemented clean visual hierarchy and typography to enhance user readability and engagement.
- Adapted layout for various screen sizes to ensure mobile-friendly design.
- Completed the test independently under a 3 days deadline.

LineCash Mobile Banking App Prototype   **Mar 2025**

UI/UX Designer (Technical Test)

This project was created as part of a UI/UX Designer technical test for Findest ID. The task involved designing a full user flow for a mobile banking app—from splash screen to fund transfer and success confirmation. I focused on clarity, trust, and simplicity to enhance the digital financial experience for users.

- Designed a mobile banking app prototype for a UI/UX Designer technical assessment.
- Created complete user flow: login, transfer to bank, input amount & PIN, and transaction success.
- Prioritized intuitive layout, consistent UI components, and user clarity.
